

WIND FARM SERVICE VESSELS

ENERGY VESSELS OFFSHORE (EVO)

MODEL: EVO24-SD-12

EVO offers workboats which have been specifically designed to operate as service vessels in the offshore energy industry. The Wind Farm Service Vessel range is based on an efficient catamaran hull form and with semi-displacement or high speed models available. Each craft can be configured to client requirements.

FEATURES

- 24 Metres LOA
- 12 passengers
- Environmentally clean and energy efficient
- Capable of operating offshore in a wide range of sea-states and weather conditions
- Have service speeds of up to 26 knots
- Are stable and provide maximum crew/passenger comfort
- Incorporates more conventional catamaran hull form and propulsion resulting in lower capital outlay
- Have superior at rest stability characteristics in rough sea-states
- Have superior load/passenger carrying capacity at high service speeds
- Are constructed to European classification society and flag state requirements
